Subject Index

A

- AOD
 - Refractory practice 499
 - Refractory technology 359, 451
- Aluminum alloys; Phosphorus analysis 225
- Aluminum castings
 - Hot isostatic pressing 607
 - Quality assurance through nondestructive testing 243
 - Repair welding 621
 - Wheel rim fatigue strengths 681
- Aluminum-silicon alloys
 - Characterization of eutectic microstructure by electrical resistivity 17
 - Strontium and sodium modification, a review 7
 - Thermal analysis for control of modification 351
- Aluminum-silicon-magnesium alloys
 - Fracture related properties vs. microstructure 281
 - Reduced iron effects vs. beryllium additions and sodium modification 157
- Analysis of phosphorus in Al and Al alloys 225
- Analysis; Sampling for spectrochemical analysis of cast iron 799

B

- Bentonite-bonded silica and zircon sands,
 - thermal conductivity 183
- Beryllium additions to A357 with low iron 157
- Blowholes
 - Correlated to gas evolution from core resin binders 365
 - Formation in ductile iron related to slag reaction 161

C

- Carbon monoxide from cupola using stack air
 - or afterburner 769

Cast iron

- Graphite shape measurements (MSF) and ultrasonic test data related to tensile properties 721
- Ni-hard 4 microstructure-property relationships 47
- Titanium carbonitrides morphology and mechanisms 639
- Ceramic shell investment casting automated (CLAS process) 199
- Chilling tendency decreased in hypoeutectic and eutectic
 - CG iron 205
- Cleaning and finishing; Particulate emission controls for snagging grinders 789
- Coke bed; Hydraulic radius measurement 541
- Coke reactivity effect on cupola performance 585
- Compacted graphite cast iron
 - Base sulfur effects 807
 - Chilling tendency decreased by post-inoculation in hypoeutectic and eutectic alloys 205
 - Fe-C-Al property improvement 593
 - Graphite flotation, exploded graphite 841
 - Graphite formation 781
 - Graphite formation mechanism 831
 - Graphite substructure study 313
 - In-the-mold treatment 855
 - Titanium carbonitrides mechanisms and morphology 639
- Computer applications
 - CAD/CAM in the foundry 345
 - Gas pressure testing of molds and cores 145
 - Gating and risering system design for ductile iron 475
 - Maintenance model 747
 - Microprocessor use in R & D 515
 - NC and CNC in patternmaking 743
 - Risering by geometric modeling 127
 - Simulation of exothermic practice in risering
 - steel castings 89
 - Solidification simulation using the q-method 509
- Copper alloys
 - Lead emissions from brass alloys C84350 and C83600 711
 - Solidification and solidification diagrams 137

Volumetric shrinkage and gap formation determinations . . .	81	Energy; Efficiency in recuperative hot blast cupola	657
Copper-nickel alloys; Niobium modified, production of chest casting	165	Expendable polystyrene process; Cast-on surface for wear resistance	65
Core sand gas evolution related to blowholes	365	Exploded graphite in CG and ductile irons	841
Corebox conversions	275	F	
Cost study; Cupola melting	729	Fatigue life in ductile iron affected by type 5 graphite	61
Cupola		Fatigue strength; Testing permanent mold and die cast Al wheel rims	681
Causes of hot spots in unlined, water-cooled shell	501	Fluidized bed furnaces	21
Emissions when using an afterburner or stack air	769	Fluxes	
Flow measurement of hydraulic radius in coke beds	541	Control steel slags	487
Melting cost study	729	Spent potlining replaces fluorspar in steel melting	493
Output as a function of coke reactivity	585	Fracture characteristics of phenolic urethane nobake sands	751
Recuperative hot blast energy efficiency	657	Fracture of ferritic plates in ductile iron	37
Silicon loss vs. charged silicon	1	Fracture related properties of A357-T6 vs. microstructure	281
D		Fracture toughness; Permanent molded magnesium treated iron	867
Defects		Furan binders; Strength affected by silica sand chemistry, grain shape and size	613
Aluminum welds	621	Furnaces; Fluidized beds for heating treating	21
Ductile iron in-the-mold castings	821	G	
Shrinkage cavity prediction in steel castings	463	Gas pressure test data computerized	145
Die cast and permanent mold Al wheel rim fatigue strength	681	Gating and risering design for ductile iron	475
Dimensional tolerances; High density mold castings data collection	699	Graphite flotation, exploded graphite, in CG and ductile irons	841
Ductile iron		Graphite formation	
Applied risering techniques	173	CG and ductile irons	781
Austempered, microstructure-impact toughness relationships	253	Hypereutectic gray iron	217
Austempered, section size sensitivity evaluations	289	Mechanism in CG iron	831
Austempering process control	377	Graphite morphology	
Bainitic, commercial process development	377	Chunky graphite in heavy section ductile iron	119
Blowhole formation related to slag reaction	161	Compacted graphite substructures vs. other types	313
Degenerate graphite effect on low cycle fatigue	61	Image analysis of RE ductile iron	629
Fracture toughness of chill-free permanent molded iron	867	Quantitative measurements (MSF) related to cast iron tensile properties	721
Gating and risering system design	475	Gray iron	
Graphite flotation, exploded graphite	841	Alloying effect on elevated temperature properties	389
Graphite formation	781	Graphite formation in hypereutectic iron	217
Heavy section, SEM study of chunky graphite	119	Sampling for spectrochemical analysis	799
Image analysis of graphite morphology with varying RE nodulizers, inoculant amount, and cooling rate	629	Green sand	
In-the-mold casting defects	821	Control using trend analysis	423
In-the-mold nodulizing alloys	263	Reclaimed by thermal and mechanical means	303
Magnesium ferrosilicon with rare earth influences nodule count	71	Reclaimed for cores	101
Magnetic permeability tests	253	Grinding; Particulate emission controls	789
Molybdenum effects on kinetics of tempering	25	H	
Nodularity correlation to nodulizer content, section thickness and mechanical properties	549	Health; Blood lead analysis procedures	707
Nodulizing alloys developed for in-the-mold process	263	Heat transfer determinations at mold-metal interface	689
Sampling for spectrochemical analysis	799	Heat treatment	
Section size sensitivity evaluations in austempered iron	289	Effect on impact toughness of cast steel	325
Spiking (ferritic plate fracture)	37	Fluidized bed furnace applications	21
Thermal analysis use in process control	151	Hot isostatic pressing	523
Dust and sludge hazardous waste treatment methods	715	Aluminum castings	607
E		Hot sand problem reviewed	879
Electrical resistivity measurements related to Al-Si eutectic microstructure	17	Hot tearing; Vs. residual elements in steel	647
Electroslag process	109	Humidity effect on curing of nobake binders	455
Elevated temperature properties of alloyed gray iron	389	I	
Emissions from cupola operated with stack air or afterburner	769	Impact toughness of cast steels improved by intercritical heat treatment	325
Emissions			
Lead levels from brass alloys C84350 and C83600	711		
Snagging grinder particulate controls	789		

In-the-mold process	
Compacted graphite iron production	855
Ductile iron casting defects	821
Faster dissolving nodulizers	263
Improves Fe-C-Al compacted graphite irons	593
Inoculation; CG iron chilling tendency decreased by Al use	205
Investment casting	
Automatic counter gravity casting of shell molds	199
CLAS process	199

K

Knockout test	765
---------------	-----

L

Ladle disposable linings for low alloy steel	229
Ladle preheating; Electric	55
Lead	
Blood analysis procedures	707
Emissions from brass alloys C84350 and C83600	711

M

Machinability; Improved in Ni Cr white iron	235
Magnetic permeability tests in austempered ductile iron	253
Maintenance model for economical unscheduled repairs	747
Melting	
Al in a high velocity reverberatory furnace	815
Cost study for cupola	729
Technology and process control	661
Microstructure of aluminum; Related to electrical resistivity measurements	17
Mold-metal interface heat transfer determinations	689
Molybdenum in ductile iron; Effects in quenched and tempered iron	25

N

Ni-hard 4 alloys; Microstructure property relationships	47
Nickel chromium white iron with improved machinability	235
Nodularity in ductile iron; Related to nodulizer content, section size and mechanical properties	549
Noise reduction for shakeout	269
Nondestructive inspection program brings assured quality to Al castings	243
Nucleation; Ductile iron, influence of magnesium ferro-silicon with rare earths	71

P

Patternmaking; NC and CNC applications	743
Permanent mold casting	
Al wheel rim fatigue strength	681
Fracture toughness of magnesium treated iron	867
Phenolic urethane nobake sand characteristics	751
Phosphorus analysis in Al and Al alloys	225
Process control; Molten metal	661

Q

Quality assurance through nondestructive inspection of Al castings	243
--	-----

R

Rare earth	
For in-the-mold steel treatment	433
Nodulizers effect on graphite morphology	629
Treated CG irons, base sulfur effect	807
Refractories	
Cold disposable ladle lining study	229
Performance in AOD operations	499
Performance in AOD vessels	359
State of the art for AOD installations	451
Research assisted by microprocessor system	515
Reverberatory high velocity furnace for melting Al	815
Riser design; Computer assisted geometric modeling	127
Risening	
Computer modeling of exothermic effects	89
Ductile iron, applied risening techniques	173
Insulation use saves metal	447
Risening and gating design for ductile iron	475

S

SEM analysis of austenite in austempered ductile iron	253
Sampling for spectrochemical analysis of cast iron	799
Sand binders	
Gas evolution from resin systems related to blowholes	365
Humidity effect on curing of nobakes	455
Phenolic and aluminum phosphate systems strength study	667
Reclamation of synthetic amorphous hydrogel nobake binder	95
Synthetic amorphous hydrogel (SAH), inorganic system	675
Sand cooling reviewed	879
Sand mixing energy input vs. sand grain sizes and mechanical properties	559
Sand molding; Humidity effect on nobake binders	455
Sand properties	
Hardness as an indirect measure of physical properties	191
Mixing energy relationships to strength properties in sands of different grain sizes	559
Phenolic urethane nobake sands	751
Strength interrelationships in resin bonded sands	667
Strength of furan sand strength affected by silica sand properties	613
Sand reclamation	
Nobake binder, synthetic amorphous hydrogel	95
Thermal and mechanical methods for green sand	303
Thermal and pneumatic methods used for green sand	101
Sand systems; Hot sands, the problem and its cure	879
Sand testing	
Gas pressure test data computerized	145
Hardness as an indirect measure of physical properties	191
Knockout property of sodium silicate sands	765
Methylene blue clay test using the spectrophotometer	77
Statistical analysis of trends	423
Section size sensitivity evaluations in austempered ductile iron	
	289
Segregation in cast steel controlled	297
Shakeout noise reduction	269
Shrinkage	
Cavity prediction in steel castings	463, 527
Determination in solidification of copper alloys	81
Related to cooling conditions in zinc-aluminum alloys	569
Silica sand properties and processing affects furan sand strength	
	613
Silica sands; Thermal conductivity when bentonite bonded	183
Silicon loss vs. charged silicon in the cupola	1
Slag-blowhole reactions in ductile iron	161
Slag; Chemistry and control	487
Sodium and strontium modifications of Al-Si alloys	7

Sodium modification in A357 with low iron	157	Titanium carbonitrides morphology and mechanisms in	
Sodium silicate; Knockout property test	765	cast irons	639
Solidification		Trends in melting technology	661
Diagrams for copper alloys	137
